

Eco-Soil Bio Activator

Seaweed and fermentation extracts have been used in turf grass management for decades, promoting the microbial activity that is essential for the plant's ability to access and uptake nutrients.

Eco-Soil Bio Activator takes that one step further by adding micro-nutrients that boost turf color and response. The result is an input that dramatically enhances the soil environment for your turf, and boosts the plant's natural ability to increase root strength and mass.

Additionally, there are studies that indicate that the ingredients of **Eco-Soil Bio Activator** enhances plant resistance to stress.

Benefits

- ✔ Enhances root growth and mass
- ✔ Promotes increased microbial activity in the root zone
- ✔ Increases turf color
- ✔ Improves soil water retention and nutrient uptake
- ✔ Enhances plant's resistance to various stresses
- ✔ Reduces premature senescence
