

## Turf Maintenance Program

### Turf Pre-Plant Program – All Grasses

<b>Organic Fertilizer</b>	1 Bag per 2,000 Sq. Ft.
<b>Medina Plus Hose End</b>	1 Quart per 5,000 Sq. Ft.
<b>High Cal Pelletized Lime</b>	1 Bag per 3,000 Sq. Ft.
<b>Humic Acid</b>	1 Bag per 10,000 Sq. Ft.

This program helps young turf get established in our coastal environment. This is accomplished by providing a slow release nutrient source in the 4-4-4 organic. The lime will adjust the soil PH. The greens grade humates will increase the soil CEC, and help hold the nutrients in the soil.

#### \*Notes

- All of our synthetic fertilizers are custom blended to match our sandy loam coastal environment.
- GEO Zoysia needs a PH between 6 – 7.
- Bermuda turf requires more nitrogen than most varieties of turf.
- All products are available from GCO Landscape Supply in Foley, Alabama.
